Rubber, Tire & Tire Sealant Applications

The leading tire manufacturers in the industry trust the RingExtruder for their high-end applications.

The RingExtruder, with its patented 12-screw compounding configuration, takes difficult to mix ingredients, like rubber and oil, and produces an homogeneous unified product in a continuous process.

Combined with CPM's smart technology, the RingExtruder is designed to meet and accede the highest of requirements and is a top performer in the industry.

Let Us Test it **For You**

Our innovation labs are equipped to assist in developing and optimizing your processes.

Benefits

- Complete systems available
- High performance: continuous process with the small RingExtruder RE3 can create 800,000 tires worth of sealant a year
- Smart technology to discharge material when deviation identified
- Small footprint that requires less manpower
- Partner to optimize and perfect process in state-of-the-art Innovation lab
- Full lifecycle support

CPM Holdings, Inc. is a diversified leading global supplier of process equipment and engineered technologies that sustainably feed, fuel, and build a better world.
