Premium option for
animal by-product
processing

Powered by
Edge Holeformance

- Elliptical Hole for 100% clean out and perfect rod contact
- Faster installation and removal

CPM **Edge™** Hammer

Get a sharper edge and longer-wearing Hammer

Engineered with tungsten-filled pockets at high-impact points, this hammer delivers maximum durability—lasting up to three times longer than competing rendering hammers in similar conditions.

Pockets allow for 2x more Tungsten than any other hammer

The Edge™ for Rendering

The Edge™ is used in the rendering industry to reduce animal by-products such as feathers and bones into smaller particle sizes. The rendering process allows for the conversion of animal waste into valuable products such as animal feed, fertilizers, and biofuels.

From the food you and your animals eat to the fuels you require, CPM plays an important role in building a better world. Our experienced team and family of trusted brands are working together to make our planet a better place to live.
